Curriculum and Teaching and Inclusion

Target 1 Speaking/oracy across the curriculum

Develop oracy opportunities throughout the curriculum to build strong knowledge and thinking in our learning across all curriculum subjects.

Target 2 Fundamentals of Writing across the curriculum

Continue to embed the foundations of spelling, handwriting and sentence construction so that children write with accuracy and can express their ideas and learning clearly. Continue to teach children how to check and edit their work. Teach children how to develop their written work through high quality editing from notes and planning stages through to final written pieces.

Target 3: Curriculum and Teaching and Inclusion

Maths

Continue to develop the current standards in Maths to ensure children are fluent and confident mathematicians who make progress from their starting points and who are prepared for the next stage of their education.

Target 4: Curriculum and Teaching and Inclusion

Wider curriculum teaching and learning, SEND and inclusion

Continue to ensure tasks are purposeful, carefully planned, progressive and clear so that our children have opportunities to develop their understanding and knowledge across the curriculum.

Toftwood Infant and Junior School Federation

We have a School Development and Improvement Plan.

The plan for 2026-2027 is made up of 5 targets that are designed to make sure our federation is delivering the best possible education and outcomes for our children.

Target 5: Inclusion, Attendance and Behaviour and Personal Development and Well Being

Continue to build on the support and strategies in place for those with SEND and those who find aspects of learning and school a challenge.

Ensure children have high quality learning experiences and make progress from their starting points. This includes continuing to plan support and intervention for children who need this and making sure adaptations are in place.
